- 2 LED LIGHTS
- 2 SHROUDS

Price \$50.00
First Class Mail shipping included in
the price. Any special shipping
requirements extra.

* Requires at least 1 incandescent in the dimming circuit

Light Kit Installation Instructions

1. Remove Grimes lens holder from the light socket. It just snaps off.

2. Remove the bulb from the socket by pushing in and turning the bulb counter clockwise.
3. Rotate the socket so that it points toward the front of the plane and insert the LED bulb into the light socket and turn clockwise to lock it in.

4. Install the shroud on the socket and snap into position

5. Installation is complete. Check to make sure the light illuminates and dims with the panel rheostat. Make an entry in you log book of the installation and noting that this is a minor alteration.
